

PLASTIC MOULDING

COMPANY PROFILE

SPECIALISTS IN THE MOLDING OF PLASTIC COMPONENTS

1972 is the foundation year of our company:
with small steps, courage and determination
we gain the trust of a large market.

Our work has been handed down from one generation
to the next one, we have started with car light
wiring harnesses and then specialized in plastic moulding
for the automotive industry, which is, today, our core business

We have experienced the evolution of the sector
with our own eyes; curiosity towards the latest technologies
has allowed us to respond more effectively and efficiently
to our customers' requests.

50
YEARS
EXPERIENCE

COMPANY PROFILE

Our solutions for the moulding of plastic components are advanced, we produce more than 200 different items, moulded and co-moulded in the main technical polymers and we provide full support to our customers for the development of their projects.

Our team of professionals is at your complete disposal to assess the feasibility and the follow up of your projects.

All construction phases will comply with ISO 9001 and IATF 16949 standards.

COMPANY PROFILE

We can develop prototypes of equipment and components to check their correct performance and operation.

A prototype is the ideal solution when there is a need to physically test the functionality of the technical solutions used and anticipate any future critical issues.

Upon request, we can take care of the mould construction and the necessary equipment for the individual components.

A direct connection between the mould making workshop and the moulding department is the best guarantee of compliance with the timing and requirements of each project.

MOULD CONSTRUCTION

During the development stage we provide the necessary advice and support to our customers, by checking that the technical characteristics of the components are adequate and by making changes to optimize production and quality of what is molded if it is necessary.

We start from your ideas, to bring your projects to life. A team work carried out together to obtain a result that guarantees functionality and durability of the proposed solutions.

DESIGN AND CO-DESIGN

A fleet of over 30 presses, from 50 to 400 tons, which has grown over the years thanks to constant investments and an entrepreneurial vision of the future.

The moulding departments are equipped with Engel horizontal presses, fitted with automatic plastic material loading systems.

Our robotized co-moulding lines are the best technological solution to guarantee high quality and high production output. We can process numerous plastic materials, such as: PEEK, PA, PEI, PPS, PBT, LCP, PET, TVP.

STAMPING AND MOLDING

We design and build the equipment necessary for assembling and processing plastic components.

Our experience and our technical knowledge allow us to establish with our customers a relationship of complete trust and reliability.

COMPONENTS ASSEMBLY

We stock up plastic polymers of certified quality from the world's leading manufacturers.

We want to ensure to our customers value, specificity, and maximum reliability in every aspect and use.

OUR PRODUCTS: QUALITY, EXPERIENCE, KNOW-HOW AND PERFORMANCE

Here are some examples of the items that we can produce: joints, toothed wheels, threads, racks, covers and ad hoc elements according to customer's drawing.

PRODUCTS

DIMENSIONAL CONFORMITY

Our metrology department is structured to: check the size of plastic components, assess the dimensional tolerance and analyze their performance.

PROCESS REPEATABILITY

Our process management and control system allows us to constantly check 100% of the production parameters, monitoring the dew point of the materials and performing dimensional checks of the production capability.

CONFORMITY OF MATERIALS

We ensure that the components used comply with the physical and chemical characteristics required by the customer and the materials comply with current regulations.

RESPECT OF DELIVERY TIMES

Deliveries of orders according to the agreed times are constantly controlled to ensure that our customers can follow their workflows without delays.

PROCESS OPTIMIZATION

We are constantly working to improve our production processes in order to make them as efficient as possible.

We have a keen eye on new technologies and the training of our staff.

QUALITY

OUR CERTIFICATIONS

In addition to the ISO 9001 certification, our company complies with the IATF 16949 regulation, specific for the automotive sector: strict and severe controls ensure high quality production

	Current issue date: 12 September 2021 Expiry date: 11 September 2024 Certificate identity number: 10403834	Original approval(s): ISO 9001 - 30 November 2012
---	--	--

Certificate of Approval

This is to certify that the Management System of:

CMC Srl

Via Antica di Pinerolo 35, 10061 Cavour - TO, Italy

has been approved by Lloyd's Register to the following standards:

ISO 9001:2015

Approval number(s): ISO 9001 - 0029277-250

The scope of this approval is applicable to:
Moulding and co-moulding of plastic materials with and without metallic inserts according to customer's specifications.

Paul Graaf
Area Operations Manager, Europe
